DESCRIPTION

The **62000** is a GaAs Infrared Light Emitting Diode in a lensed "pill" package designed to be mounted in a double-clad printed circuit board. It is well matched to companion phototransistors and photodarlington with its narrow beam angle lens and small size which make it ideal for use in optical encoders, card reader arrays, etc. where maximum power out is not a consideration. Available binned to customer specifications and/or screened to MIL-PRF-19500.

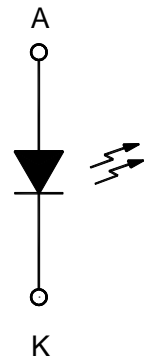

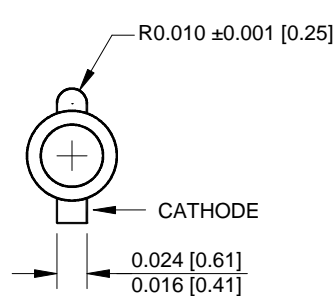

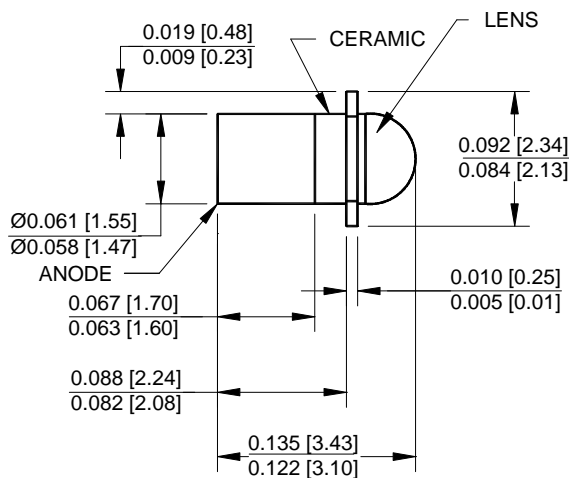

ABSOLUTE MAXIMUM RATINGS

Storage Temperature.....	-65°C to +150°C
Operating Temperature.....	-55°C to +125°C
Reverse Voltage	3Vdc
Forward Current-Continuous (at 25°C case) (see note 1)	100mA
Soldering Temperature (10 second)	240°C

NOTE: 1. Derate linearly to 125°C case at the rate of 1mA/°C above 25°C.
